

How to access MS Teams from an XBOX or PS4

If you have a PS4 or XBOX you can use them to access Microsoft Teams to learn online. Both consoles can use a keyboard and mouse which can be connected by USB leads or wireless bluetooth, or you can use your controller if you prefer.

- 1 Scroll to the far right of the bar with games to "Library".
- 2 Click on applications.
- 3 Scroll down the apps until you see "www" circled by small dots. Click on that.
- 4 Start the internet browser by pressing the triangle button on the controller to search.
- 5 Type in a search for Microsoft Teams.
- 6 Login using your student email and password.

On PS4, if you need to set or reset parental controls you can do this through using a web browser at account.sonyentertainmentnetwork.com.

Sign into your account email address and select your account from the top. Then select family account management. Once you've added a child's account you can tailor options from spending limits to restricting apps, games or daily screen time.

XBOX ONE

- 1 Press the XBOX button on the controller to open the guide.
- 2 Select "My games and apps".
- 3 Find Microsoft's internet browser "Microsoft Edge".
- 4 Type in a search for Microsoft Teams.
- 5 Login using your student email and password.

On the XBOX, if you need to set or reset parental controls you can do this through your child's account. Go to settings and find the family page. Select your child's account and access settings for privacy, online safety and web filtering.
